

Eagle Leadership provides a unique and flexible ethics, leadership and mentorship training program. It emphasizes:

- All employees to do the right thing when no one is looking
- Leaders set the example by actions and not words
- The importance of mentorship to sustain the long-term success of any organization

The Eagle Leadership concept is based on 10 Ethics Traits which we call
"A Bridge Called Ethics."

Ethics traits are interlocked and just as ethics is important to an individual, ethics forms the basis for any organization and just as the pylons anchor a bridge, senior leadership anchors the ethics program for any organization.

This program can support the achievement of mission and goals of any organization while emphasizing their core values:

- **Large and Small businesses**
- **Government agencies (Local, State, Federal)**
- **Youth groups**

Organizational Building Blocks

Ethics traits form the base layer of the building blocks necessary for a sustained ethics program for any individual. Add to that character and performance traits necessary for day-to-day success of the individual. Successful leaders must be trained and develop proper leadership traits to ensure day-to-day success of the organization. The long-term sustained success depends on senior leaders developing the mentorship skills necessary to guide the most adept junior leaders to move into senior leadership positions.

We provide ethics and leadership surveys which ensure anonymity of the survey participant. The results can assist any organization in identifying ethics and leadership issues so they can be effectively addressed before they become major issues.

We provide a variety of scenarios which can be tailored to any company or organization as well as access to book reviews for ethics, leadership and mentorship.
